Placed of Totem Poles (Dzunuk’wa and Scudder)

The Committee discussed placement of the Thunderbird with Dzunuk’wa and the Vic Scudder Totem Poles. It was felt that the Vic Scudder Totem Pole, recently gifted to the City of Duncan, would benefit from being placed against a wall because of its small girth. It was noted that there are two totem pole bases in Station Street Park and now that the Red Balloon building is gone, it was felt to be the perfect location for both of the poles.

It was moved and seconded:

**That the following recommendation be forwarded to the Committee of the Whole for consideration:**

*That after the 'Thunderbird with Dzunuk’wa' Totem Pole, carved by Ned Matilpi, has been refurnished, that it be relocated to the north-west corner of Station Street Park (on the base where the Sea and Sky (Harold Alfred) Totem Pole used to stand) with the Totem Pole facing west until the adjacent property is developed, at which time the Totem Pole can be turned to face east;*

*And That the 'Scudder' Totem Pole that was recently gifted to the City of Duncan, be placed against the south-east wall in front of the mural in Station Street Park (on the base where the Thunderbird with Dzunuk’wa (Ned Matilpi) Totem Pole used to stand).*

**CARRIED**
